Portfolio

SUMMARY

AI Solutions Strategist and Technical Product Manager with 9+ years of enterprise consulting and healthcare leadership experience. Now fully focused on AI, fluent in agentic workflows with a proven track record designing and deploying multi-agent pipelines, generative AI solutions, and intelligent automation across healthcare, consulting, and emerging tech sectors. Experienced leading cross-functional teams, managing client engagements end-to-end, and translating complex business requirements into scalable AI architectures. Adept at defining use-case frameworks, driving go-to-market strategy, managing ISV and partner ecosystems, and securing executive buy-in at the C-suite level. Passionate about accelerating enterprise AI adoption, from proof-of-concept through production deployment.

CORE COMPETENCIES

AI & Agentic Systems	Solution Architecture	Data & Analytics	Business & Operations
Generative AI (OpenAI, Anthropic, Gemini)	Agentic Workflow Design & Deployment	Financial Dashboard Development	Go-to-Market (GTM) Strategy
AI/ML Workloads & Architectures	Multi-Agent Pipeline Design	Data Visualization & Reporting	Executive Stakeholder Engagement
Prompt Engineering & RAG	On-Premise & Hybrid AI Deployment	SEO Optimization & Analytics	ISV & Partner Program Strategy
LLM Platform Integration	Use-Case & Workload Frameworks	A/B Testing & Data-Driven Decisions	Cross-Functional Team Leadership
AI Workflow Automation	Cloud & Hybrid Architecture Strategy	Deep Learning Research Integration	Engagement Management & Delivery

PROFESSIONAL EXPERIENCE

Freelance Consultant, Emerging Technology & AI Solutions

Self-Employed | 2021 – Present

Provides strategic AI consulting and hands-on technical implementation for startups, VC groups, and enterprise clients navigating the rapidly evolving AI landscape. Engagements span use-case framework development, solution architecture, go-to-market strategy, and direct deployment of AI-driven tools and workflows.

- Designed and deployed multi-agent automated workflows and generative AI solutions using leading LLM platforms (OpenAI, Anthropic, Gemini), agentic frameworks, and open-source tooling, streamlining operations and enhancing data visibility across client engagements.
- Architected and delivered full client websites and financial intelligence dashboards, translating complex business requirements into production-ready solutions.
- Provided go-to-market strategy and product consultation for Web3 startups and VC groups across multiple engagements: advised ChainHub on product strategy for their Web3 creation platform; supported seed round fundraising for a privacy-focused Telegram app with integrated trading tools, including investor materials and conversion rate analysis; and consulted on product positioning and AI feature integration for AlphaScope, a trading terminal with built-in AI analytics. Work spanned pitch deck refinement, financial modeling, valuations, and go-to-market execution.
- Authored technical whitepapers, product overviews, and AI-assisted marketing materials to drive high-impact campaigns and improve client digital presence.

Physical Therapy Clinic Director & Operations Lead

Wellness Docs | November 2022 – Present

Leads all clinical, operational, and strategic functions for a growing physical therapy practice, with a deliberate focus on integrating AI and automation to improve patient outcomes and business performance. Serves as the primary decision-maker for technology adoption, vendor

evaluation, and workflow transformation.

- Integrated agentic research tools and deep learning pipelines to continuously surface the latest clinical advancements, enabling evidence-based care at scale.
- Automated clinical workflows from patient intake through initial evaluation, reducing administrative burden and improving throughput.
- Overhauled clinic operations to achieve a 50% increase in revenue and double patient evaluations within one year, while growing weekly patient volume by 80% (from 50 to 90+ patients per week).
- Implemented data-driven patient engagement strategies that improved satisfaction scores and long-term retention.

Healthcare Consultant and Solutions Program Designer

TriHealth | April 2016 – November 2022

Served as a senior consultant designing, launching, and managing multi-million-dollar corporate wellness programs for major enterprise clients, with full ownership of program strategy, vendor ecosystems, and executive relationships. Operated in a client-facing delivery role with accountability for engagement economics, risk management, and outcomes.

- Delivered \$2M+ in annual healthcare savings for partner corporations by integrating wellness programs, optimizing vendor relationships, and managing high-cost claimant strategies.
- Evaluated third-party solutions, managed vendor relationships, and structured long-term partnership agreements with Procter & Gamble, 84.51°, Miami University, and the City of Cincinnati.
- Built entire clinics, preventative health programs, and custom client integrations from concept to launch, overseeing financial modeling and project execution end-to-end.
- Presented strategic program results, cost and clinical analyses, and roadmaps to CHROs, Presidents, and VPs, consistently achieving large-scale executive buy-in.
